SUMMARY

Certified Ethical Hacker (CEH) and Software Security Engineer with 3.9 years of experience specializing in Application Security (AppSec), Vulnerability Remediation, and building Secure Architectures. Expert in bridging the gap between development and security by implementing OWASP Top 10 mitigations, automated SAST/DAST scanning, and manual penetration testing. Proven track record of reducing organizational risk by 40% through proactive vulnerability remediation and secure SDLC integration.

WORK EXPERIENCE

Software Engineer (Application Security)

Apr 2022 – Present

Sodel Software Solutions Private Limited | Navi Mumbai, India

- **Vulnerability Remediation:** Performed regular security audits and penetration tests on enterprise web components, identifying and manually patching 20+ critical vulnerabilities.
- **Data Protection:** Architected secure communication channels by integrating HTTPS and TLS protocols, ensuring 100% encryption for sensitive client-server data.
- **Exploit Prevention:** Reduced application risk by 40% through the implementation of robust client-side validation and sanitization filters against XSS and SQL Injection.
- **DevSecOps Collaboration:** Partnered with cross-functional teams to integrate security checkpoints within an Agile SDLC, ensuring "Security by Design" for all deliverables.

KEY PROJECTS

External Security Consultant (Freelance)

Aug 2025 – Nov 2025

Client: Wix Platform (Logic & Security Audit)

- **Black-Box Testing:** Performed end-to-end security testing on a no-code Wix application, identifying logical flaws in third-party integrations and database permissions.
- **Zero-Defect Delivery:** Successfully identified and resolved functional bugs while performing a post-fix penetration test to ensure 100% vulnerability-free delivery.
- **Secure Implementation:** Enforced platform-level security best practices, including Multi-Factor Authentication (MFA) and secure API integration for third-party scripts.

Web Application Penetration Testing
Aug 2024 – Present

Personal Security Research

- Conducted active penetration tests using **Burp Suite Pro** and **OWASP ZAP** to identify critical vulnerabilities such as SQL Injection and Stored XSS.
- Delivered comprehensive remediation reports with detailed patch strategies, improving application security posture by an estimated 35%.

Secure Development Architecture
Apr 2023 – Present

Internal Initiative

- Collaborated on a secure web development project, integrating secure coding practices and threat modeling to strictly comply with OWASP standards.

TECHNICAL SKILLS

Security Tools:	Burp Suite Pro, OWASP ZAP, SonarQube, Metasploit, Nmap, Wireshark, SQLMap.
Development:	JavaScript (ES6+), React.js, Node.js, Java (Spring Boot), REST API Security.
Core Concepts:	OWASP Top 10, Secure SDLC, XSS/SQLi Mitigation, Vulnerability Assessment (VAPT).

EDUCATION

Master of Science in Computer Science
Expected Mar 2026

Ramniranjan Jhunjhunwala College | Mumbai, India

Bachelor of Science in Computer Science
May 2022

Ramniranjan Jhunjhunwala College | Mumbai, India
